

SAFE SKIES

A Drone Safety Campaign

What We Provide:

- Informative and educated articles
- Up to date safety guides & helps
- Links to other safety help sites and forums
- Links to important news articles or other drone related info.

What's Our Aim?

The purpose of this campaign website is to inform and educate drone safety to the general American public in regards to drones or UAS.

The goal is to provide specialized information on safe procedure and responsible use.

It is this campaigns aim to reach consumer drone users and non users to, increase knowledge, public awareness, de-bunk myths, and promote responsible use, leading to increased safety in our skies. We want to help you to be prepared and have the tools necessary for a safe flight.

Why is this Important?

Drones are not toys!

Today's society is bounding with technology, and drones are one of the newest trends with over a million registered w/FAA drone users in the US! With the increase in air traffic, public and pilot safety is paramount.

The increase in drone pilots, users both young and old, amateur and professional have precipitated a need for reliable information, and furthermore safety guidelines.

It can get confusing as to what rules you are to abide by. Both federal and State guidelines have been established. You need to understand the rules and regulations.
